1. EXECUTIVE SUMMARY

This proposal presents a collaborative initiative between Al Qodorat Engineering General Cont. and Swifterz Creative Engineering Services LLC to support the Preparation of the Shop drawing for the Architecture & Structure discipline and As-built model and drawing for following disciplines (Architecture, structural, MEPF, ID, Landscape, Façade, ICT), For the Oasis Pavilion project.

These efforts will ensure the successful execution of key project components, leveraging Swifterz's expertise to achieve successful outcomes and project closure.

2. ABOUT US

Swifterz is a pioneering service provider for the geospatial and construction industries through its unique BIM platform, known as "Swift GeoBIM," designed to meet a wide range of requirements. Swift GeoBIM platform integrates over 60 BIM and geospatial services, covering project stages from design and validation to assembly, procurement, project management, execution, and operation. Our global team of managers and coordinators is dedicated to managing, enhancing, and ensuring seamless services across all sectors and project types. With partnerships with over 1,000 service providers worldwide, Swifterz can execute over 100 projects simultaneously, delivering exceptional results on a global scale.

3. SCOPE OF WORK

The project scope of work outlines the specific tasks, deliverables, and objectives involved in a project. It serves as the foundation for project planning, defining what is to be achieved, the work that must be done to reach those objectives, and the parameters within which the project must operate. The option involves the Preparation of the Shop drawing for the Architecture & Structure discipline, verifying the clashes for MEP services after the approved shop drawings and As-built model and drawing for the following disciplines (Architecture, structural, MEPF, ID, Landscape, Façade, ICT), For the Oasis Pavilion project.

The following are the scope of work main elements:

Preparation of Shop drawings for the following disciplines from BIM model:

- ARCHITECTURE
- STRUCTURAL
- ID
- LANDSCAPE
- FAÇADE

Identify and manage the clashes for the MEP after approved shop drawings:

- MEPF

Preparation of As-Built drawings for the following disciplines from BIM model

- ARCHITECTURE
- STRUCTURAL
- MEPF
- ID
- LANDSCAPE
- FAÇADE
- ICT

Note: As applicable disciplines will be considered.

Technology to be Used:

S.No	Software
1.	AutoCAD
2.	Revit

4. DELIVERABLES

Preparing shop drawing for disciplines mentioned below from IFC drawings, updating Revit model up to LOD 400 & LOD 500, and extracting the shop drawing and As-built:

- RVT-LOD 400 Model
- DWG – Shop Drawings
- PDF – Shop Drawings
- RVT-LOD 500 Model
- DWG – As-Built Drawings
- PDF – As-Built Drawings

Note: Disciplines applicable for the deliverables from the agreed scope, i.e, mentioned in Section 3

5. EXCLUSIONS

- CDE setup/Licenses
- BIM documents (BEP, LOIN, etc)
- Design scope
- Quantities & Schedules
- Any 3D Renders or walkthroughs.
- 4D/5D simulations
- Structural rebar modelling

6. COMMERCIAL OFFER

	Task	Duration (Weeks)	Total Price (AED)
1	- Upgrading the model from LOD 300 to LOD 400 BIM Model - Extract the Shop drawings. - Discipline: Architecture and structure	4 weeks	
2	Develop the model and identify and manage the clash for MEP services after the approval of shop drawings	4 weeks	
3	- Upgrading the model from LOD 400 to LOD 500 BIM Model - Extract the As-built drawings. - Discipline: Architecture and structure	2 weeks	
4	- Upgrading the model from LOD 300 to LOD 500 BIM Model - Extract the As-built drawings. - Discipline: All disciplines other than Architecture & Structure	6-8 Weeks	

- 5% VAT is applicable to the above price, in accordance with UAE law.

6.1 PAYMENT TERMS

The Oasis Pavilion project		
Payment Basis	Terms	Timeline
Advance Payment	10%	Initial for mobilization
Milestone 1	20%	Upon completion of the Architectural, Structural Shop drawing
Milestone 2	30%	Upon completion of Clash identification and manage for MEP services
Milestone 3	20%	Upon completion of the Architectural and structural As-built drawing
Milestone 4	20%	Upon completion of As-built drawing for all discipline
