EXECUTIVE SUMMARY

Java Developer with 2 years of experience in building and integrating applications using React.js. Skilled in connecting frontend with backend using Java, Python, and PHP to develop APIs. Experienced in working with databases like MySQL, handling authentication, and ensuring smooth data flow. Focused on creating high-quality, secure, and scalable solutions. Eager to work with a progressive team to build innovative and efficient applications.

TOOL & TECHNOLOGIES

Technologies:

Core Java, J2EE, Advance java, Spring boot, HTML/CSS, Java Script, Python.

Database Skills:

MySQL

Familiar Tools:

Eclipse IDE, Visual Studio, Postman, Git hub.

PROFESSIONAL EXPERIENCE

Jr Java Developer

July 2023 - Present

Merry's Infotech New-Gen Educare, Bangalore

Project 01:

- **Name :** Bluechip Services International Pvt.Ltd
- **Role :** Java Developer
- **Project Link :** <https://bluechipservicesinternational.org/BUECHIP/>
- **Description:**

Bluechip is a web application designed for students planning to study abroad, providing services to simplify the process. The student panel allows users to view colleges based on their eligibility and track their visa application status. Developed landing pages and student panel modules while improving features and ensuring smooth performance.

Project 02:

- **Name :** AECP
- **Role:** Java developer
- **Project Link :** <https://aecp.aecearth.io/>
- **Description:**

Actively contributing to the development of a construction project management tool, optimizing site management, labor coordination, and material procurement. Enhancing project tracking and resource utilization while gaining hands-on experience in PHP, React.js, and MySQL to ensure scalability and performance.

Project 03:

- **Name :** Jiffy
- **Role:** Java developer
- **Project Link :** <https://jiffy.mineit.tech/>
- **Description:**
Developed Project Management and HR modules for Jiffy using Python APIs and React.js.
Streamlined task allocation, tracking, and communication with real-time notifications and reporting tools. Enhanced productivity and collaboration across teams.

Roles and Responsibilities for the Projects:

- Collaborated with test leads & stakeholders to understand data modules & functional requirements.
- Developed and optimized backend APIs using Python, improving system performance by 30% and enhancing efficiency.
- Collaborated with frontend developers for API integration & server-side logic, ensuring seamless functionality.
- Conducted weekly code reviews with the backend team, ensuring continuous optimization and improving overall code quality.

EDUCATION

Bachelors of Engineering – Computer Science Engineering

Academic year (2019-2023)

MVJ college of Engineering, Bangalore

CGPA - 9.0

ADDITIONAL INFORMATION

Languages:

English, Tamil, Kannada, Telugu

Certifications:

- Certificate of Completion of Java Full Stack course from Jspideres .
- Course Completion Certificate of Introduction to Python from mind luster.
